

Mobile Design Patterns

Navigation :

Find 1*, 2* apps. And find out what not to do

2 types of Navigation:

- Primary Navigation
 - Secondary Navigation
- Persistent
- Transient

Persistent: Remains throughout the app

Transient:

Inlay - Pushes the screen
Overlay - Partially or Fully covers the screen.

Time Trackerz

Component:

- App.js

- Editable Timerz

Timerz

TimerForm

- Toggleable

TimerForm

- Timerz

- TimerButton

Components

ClassComponent

FunctionalComponent

Why is Functional Components are better?

→ Reusability is better

→ If you don't need to use lifecycle method / states

→ Rule of thumb

No state / No lifecycle method,
use functional components otherwise
use class components.
